## PROFILE

Picture this: You're standing in a busy subway car, dying to get out and reach your daily Tims. You find yourself searching for patterns in each stop - where the doors are opening, how many people get off. Anything to get you closer to the exit - to the coffee. I like to operate in an efficient manner, to find the patterns that generate a clean way of living. This is where my love for code comes in. I've been making and breaking webpages since I was 12 and always searching for that clean and efficient line. It keeps me sharp, engaged and focused. This is my vocation.

## SKILLS

### LANGUAGES

- \* Ruby
- \* Javascript
- \* Python

### FRAMEWORKS

- \* Ruby on Rails
